It combines slow, present, deeply attuned touch, allowing your nervous system to soften, tension to melt, and your energy to flow. The massage is personalised, blending deep tissue, myofascial, therapeutic, energetic, and classic techniques. Expect more calm, clarity, and embodied presence. This pause helps your body integrate everything you're experiencing, so you return to the festival with more clarity and inner ease.

During the session, we gently bring your system back into its natural balance, cultivating a sense of safety, groundedness, and deep physical relaxation, while also expanding your subtle layers of being. Different types of massage  
& sound healing

I offer therapeutic massage and sound healing sessions that support deep relaxation and nervous system regulation. My massages are intuitive, slow, and attentive, allowing the body to release stored tension and soften into a sense of safety and ease.

Sound therapy with Tibetan singing bowls adds another layer of support, using vibration and resonance to calm the mind and gently rebalance the body. Each session is adapted to the person in front of me and to what their body needs in the moment.

My intention is to create a grounded, restorative space where touch and sound meet, inviting the body to rest, reset, and reconnect with its natural rhythm.

## Reflexology of the feet & hands

For over a decade, my work has grown from deep personal experience and exploration of the human psyche, trauma, and the subconscious patterns that shape our emotions, decisions, and lived reality. Through years of training in somatic and awareness-based practices (including reflexology, NVC, IAIM, CI, QHHT), my focus has been on creating safe, effective pathways for healing that reconnect people with their bodies, emotions, and inner clarity.

I will be offering foot and hand reflexology. This gentle yet powerful practice works through the nervous system, influencing the emotional, mental, physical, and energetic layers of experience. Reflexology is more than a massage – through specific reflex points, the whole body is addressed. After a session, participants experience deep relaxation, a calmer mind, increased body awareness, emotional release, grounding, and a sense of inner space, safety, and renewed capacity to breathe and move through life with more ease.

## Energy accupressure bodywork

The energy healing I offer combines a variety of healing techniques and principles rooted in the wisdom of our ancestors and ancient traditions.

My body acupuncture technique is based on principles from Traditional Chinese Medicine as well as ancient Slovenian healing practices. It supports the healing of both emotional and physical wounds by encouraging the body to return to its natural state of growth, repair, and regeneration.

### This approach may support people experiencing:

ANXIETY | STRESS | MELANCHOLY | HERNIATED DISCS |  
CARPAL TUNNEL SYNDROME | LACK OF FOCUS | CYSTS  
AND OTHER PHYSICAL OR EMOTIONAL IMBALANCES

- **1 healing session**

60 min - 50€

- **2 healing sessions**

60 min - 80€ (40€ per session)

- **Biofield (Aura) Cleansing**

Biofield cleansing is based on the ancient Slovenian tradition of pouring molten lead or wax. The practice is intended to cleanse the energetic field (aura) of energies believed to have been directed toward a person on both conscious and unconscious levels, such as gossip, malice, envy, self-destructive patterns, and uncontrolled thoughts.

# Žiga Lukman

Holistic massage including energy & breathwork

I work with touch as a language. My background is in therapeutic massage, myofascial work, breath and subtle energy practice. What defines my sessions is presence. I don't follow fixed routines; I listen and respond to what your body is ready to release or receive.

Festivals can open a lot, physically and emotionally. A session with me is a space to land and recalibrate. Strong when needed, slow when needed, always respectful of boundaries.

The aim is not only relief, but coherence - so you leave clearer, steadier and more inside yourself.

## Hangab

Hangab is a body-based experience that combines inversion, breath, and mindful guidance. Within a safe and structured setting, participants are gradually supported into a suspended position — without pressure, without performance.

The method works directly with the nervous system: gravity, compression, and conscious presence can support release, regulation, and a refined awareness of the body. Each session follows three phases — arrival, guided inversion, and integration.

Hangab is not a spectacle. It is a space for depth — an invitation to soften control, cultivate trust, and listen to the intelligence of the body.

## Craniosacral reintegration

I work with craniosacral reintegration - a gentle, precise approach that supports the body in releasing tension, regulating the nervous system, and processing unresolved experiences.

My work ranges from deep therapeutic processes to simple relaxation, always guided by what the body needs. Festivals often open more than we expect: emotions, memories, intensity. My space is where these experiences can land, be processed, and integrated through the body, not just the mind.

This is not about fixing. It's about allowing the system to return to its natural balance.

# Igor Žabič

## Bioenergy healing

My name is Igor, and I discovered Bioenergy Healing through my own journey with sports injuries. When conventional recovery wasn't enough, energy work helped me restore balance, reduce pain, and reconnect with my body's natural healing power. That experience changed my life - and became my mission.

Today, I offer Bioenergy Healing to support others facing physical pain, emotional challenges, or life imbalances. My intention is to create a safe, focused space where your body can activate its own healing potential and return to harmony.

## Breathwork sessions 1:1

Hi, my name is Katja, and I am a certified breathwork facilitator. I have been practicing breathwork for nearly three years, during which it has profoundly changed the way I experience myself and the world around me.

Breathwork, when guided in a safe and supportive way, can be a deeply insightful process.

Our breath is more than just fuel for the body—it is a bridge between the conscious and subconscious. Through conscious breathing, the mind softens, the body relaxes, and space opens for deeper awareness.

In this space, breathwork can reveal what is quietly held within us and offer moments of clarity, insight, and reconnection. Each session is an invitation to slow down, listen inward, and meet yourself with curiosity and care.

## Traditional reiki support

With a background in yoga, therapeutic tui-na massage, and holistic wellbeing, I offer Traditional Reiki - Usui Reiki Do as a gentle, supportive practice for deep rest, inner balance, and reconnection. This is a calm and meditative treatment that invites you to slow down, soften, and return to yourself.

Reiki works through subtle energy and conscious presence. During the session, you rest fully clothed while receiving gentle hands-on or hands-above support in a safe and nurturing space. The treatment is designed to help ease stress, quiet the mind, regulate the nervous system, and support your natural capacity for harmony and renewal.

My approach is intuitive, grounded, and deeply respectful of the individual. It is especially suited for those who feel energetically depleted, emotionally overwhelmed, disconnected from themselves, or simply in need of stillness, care, and restoration.

# Petra Čarman

## Tarot Reading

Petra Carman offers Tarot readings shaped by 10 years of practice, a PhD in social psychology, and long-term engagement with esoteric systems and ritual work. She works one-to-one with Tarot as an encounter that helps people shift from mental overload and uncertainty into a clearer sense of orientation within what they are facing.

The experience supports a change in how a situation is seen: from diffuse or overwhelming to more coherent and readable. People often leave with a stronger sense of direction, perspective, and internal alignment with what feels relevant next.

Tarot is the primary tool, sometimes supported by oracle cards.

## Tattoo session

Hi, I'm Nika - a tattoo and visual artist from Ljubljana, Slovenia.

My work is inspired by nature and organic forms. I specialize in fine line and blackwork tattoos, always designed to flow naturally with the body.

With a background in visual arts (AVA Academy) and years of experience shaped through my journey from Ljubljana to London, I've developed a style rooted in details, precision, softness, and intention. I focus on creating a warm, relaxed atmosphere where you can feel fully at ease.

Whether you choose from existing designs or co-create a custom piece with me, the process is guided with care, presence, and attention to your vision. Expect not just a tattoo, but a thoughtful experience—one that allows you to slow down, connect, and leave with something truly personal.

## Temporary Tattoo

During my 14 years of experience as tattoo artist, I have not only developed a deep knowledge of the physical anatomy and how art can highlight the body's natural beauty but I have also chosen a path through different levels of consciousness that allows me to bring a more profound and spiritual approach to my work.

I offer tattoos with awareness (both: permanent and temporary, with jagua). Every project is a ceremony. We co-create the design based on the most alchemized version of the person's intention. In order to reach a divine intention, I guide my clients using techniques that allow them to master their emotional and psychic plane.

For the past 4 years, I have studied the Freedom teachings which inspired me to create a new format for the sessions I offer. The discussion we have prior to the tattoo allows the client not only to alchemize their own experience but to innerstand the basic ascension's mechanics.

Tattooing becomes a means of realigning energetic bodies with their eternal essence and carrying that force with grace.
