

COOKIE POLICY

1. Introduction

This Cookie Policy explains how **Armida, organizacija dogodkov, d.o.o.**, having its registered office at Trnava 76, SI-3303 Gomilsko, Republic of Slovenia (the "**Company**", "**we**", "**us**" or "**our**"), uses cookies and other similar technologies when individuals access, browse or otherwise interact with the website available at <https://guardiansfestival.com>, together with all associated webpages, subdomains, mobile versions and digital services (collectively, the "**Website**").

The purpose of this Cookie Policy is to provide transparent information about the technologies used by the Website, the purposes for which they are deployed, their legal bases, the categories of information collected, the circumstances in which personal data may be processed, and your rights and choices regarding cookies and similar technologies.

Where the use of cookies results in the processing of personal data, such processing is carried out in accordance with applicable data protection legislation, including Regulation (EU) 2016/679 (the General Data Protection Regulation, "GDPR"), the Slovenian Electronic Communications Act (ZEKom-2), and other applicable laws governing electronic communications and personal data protection.

This Cookie Policy should be read together with our Privacy Policy, which provides additional information about the processing of personal data, your statutory rights, and how those rights may be exercised.

2. Scope of this Cookie Policy

This Cookie Policy applies to all visitors, users and other individuals accessing or using the Website, regardless of the device or technology used. It covers information collected through desktop and mobile browsers, tablet devices, embedded multimedia content, online forms, analytical and advertising technologies, and third-party integrations available on the Website.

This Cookie Policy does not apply to third-party websites that may be accessible through hyperlinks published on the Website. Such websites operate independently of the Company and remain subject to their own privacy notices and cookie policies. The Company does not accept responsibility for the privacy practices or content of third-party websites or services.

3. Definitions

For the purposes of this Cookie Policy, the following definitions apply.

"Cookie" means a small text file stored on a user's terminal equipment by a website for the purpose of recognising the device, remembering preferences, enabling functionality or collecting information relating to the use of the Website.

"First-party cookie" means a cookie placed directly by the Company through the Website.

"Third-party cookie" means a cookie placed by a third-party service provider whose services are integrated into the Website.

"Session cookie" means a cookie that expires automatically when the browser session ends.

"Persistent cookie" means a cookie that remains stored on the user's device until its expiry date or until manually deleted.

"Personal data" means has the meaning assigned to it under Article 4(1) GDPR and includes any information relating to an identified or identifiable natural person.

"Processing" means has the meaning defined in Article 4(2) GDPR.

"Consent" means any freely given, specific, informed and unambiguous indication of the data subject's wishes by which they signify agreement to the processing of personal data, in accordance with Article 4(11) GDPR.

"Terminal equipment" means any device capable of storing or accessing information, including computers, smartphones, tablets and similar electronic devices.

"Similar technologies" means pixels, tags, software development kits (SDKs), local storage, session storage, web beacons, scripts and other technologies capable of storing or accessing information on a user's terminal equipment.

4. Applicable Legal Framework

The Company's use of cookies is governed primarily by the GDPR, the Slovenian Electronic Communications Act (ZEKom-2), applicable legislation regulating electronic communications and consumer protection, decisions and guidelines adopted by the European Data Protection Board (EDPB), interpretative guidance issued by the Slovenian Information Commissioner, and relevant case law of the Court of Justice of the European Union.

Where cookies involve the processing of personal data, the GDPR applies together with the rules on storing and accessing information on terminal equipment under ZEKom-2. Nothing in this Cookie Policy shall be interpreted as limiting or excluding any rights granted to individuals under mandatory provisions of applicable law.

5. Relationship with the Privacy Policy

This Cookie Policy forms an integral part of the Company's broader privacy compliance framework. While this Cookie Policy specifically regulates the use of cookies and similar technologies, our Privacy Policy provides more comprehensive information on the categories of personal data processed, the purposes and legal bases of processing, recipients of personal data, international transfers, retention periods, technical and organisational security measures, and the rights available to data subjects under the GDPR.

In the event of any inconsistency between this Cookie Policy and the Privacy Policy regarding the processing of personal data, the Privacy Policy shall prevail, unless mandatory provisions governing electronic communications require otherwise.

6. Fundamental Principles Governing the Use of Cookies

The Company is committed to using cookies lawfully, fairly and transparently. Cookies are deployed only where there is a clearly defined and legitimate purpose, and strictly necessary cookies are limited to those essential for the secure operation and functionality of the Website. Optional cookies are activated only after valid consent has been obtained where required by law, and users remain free to refuse or withdraw consent without detriment; cookie preferences are respected and may be changed at any time. Personal data obtained through cookies are processed only to the extent necessary for the specified purposes, applying the principles of data minimisation, storage limitation and integrity

throughout the lifecycle of the information collected, and appropriate technical and organisational safeguards are implemented to protect it.

The Company does not use cookies for purposes incompatible with those described in this Cookie Policy. Nor does it intentionally use cookies to collect special categories of personal data within the meaning of Article 9 GDPR, or knowingly use cookies to identify children or vulnerable individuals for behavioural advertising purposes.

7. Cookies and Similar Technologies

7.1 General

The Website uses cookies and other technologies that store information on, or access information from, a user's terminal equipment. These technologies support the secure operation of the Website, facilitate the delivery of requested services, improve user experience, measure Website performance and, subject to your consent where required, enable analytics, advertising and other optional functionalities.

For the purposes of this Cookie Policy, the term "cookies" also includes comparable technologies that perform similar functions, regardless of whether information is stored through traditional HTTP cookies or other technical means. The Company seeks to minimise the use of tracking technologies and deploys only those reasonably necessary for clearly defined and legitimate purposes.

7.2 Technologies Used by the Website

Depending on the functionality used, the Website may employ one or more of the following technologies.

(a) HTTP Cookies

HTTP cookies are small text files stored by your web browser. They let the Website recognise your device on subsequent visits, maintain session continuity, remember your preferences and support various Website functions. Cookies may be either session cookies or persistent cookies.

(b) Local Storage

The Website may use HTML5 Local Storage. Unlike traditional cookies, Local Storage keeps information on your device even after the browser has been closed. Where information stored through Local Storage is not strictly necessary for the Website's operation, it is used only after obtaining your consent where required by law.

(c) Session Storage

Session Storage temporarily stores information only for the duration of the browser session and is automatically removed once that session ends. It is used mainly to maintain temporary application states and improve Website functionality.

(d) Web Beacons

The Website may contain electronic images, web beacons, clear GIFs or similar technologies, which help us understand whether particular content has been viewed, whether pages have loaded successfully, and whether certain user interactions have occurred. Web beacons do not generally store information directly on your device but may operate together with cookies.

(e) Tracking Pixels

Tracking pixels are small pieces of code embedded within webpages that enable communication with third-party services such as advertising or analytics providers. Depending on your consent preferences, they may be used to measure conversions, evaluate advertising campaigns, understand visitor behaviour, improve marketing effectiveness and build aggregated statistical reports. Pixels are activated only where the applicable legal basis exists.

(f) Software Development Kits (SDKs)

Where the Company offers mobile applications in the future, SDKs may be used to provide analytics, authentication, security or messaging functionality. This Cookie Policy applies equally to SDK technologies insofar as they perform functions equivalent to cookies.

(g) Similar Technologies

The Company may use other technologies that perform substantially similar functions to cookies. Such technologies are always subject to the same legal principles described in this Cookie Policy where they involve storing information on, or accessing information from, a user's terminal equipment.

8. Why We Use Cookies

The Company uses cookies solely for legitimate, specified and transparent purposes, depending on the category of cookie: to ensure the secure operation of the Website, protect against malicious activity and cyber threats, maintain user sessions, remember cookie preferences, provide language and display preferences, improve Website performance, identify technical errors, analyse Website traffic, measure audience engagement, evaluate marketing campaigns, display relevant advertisements where consent has been given, enable multimedia functionality, prevent fraudulent use of the Website, and comply with legal obligations. The Company does not use cookies for purposes incompatible with those described in this Cookie Policy.

9. Legal Basis for the Use of Cookies

The storage of information on a user's terminal equipment, and access to such information, is governed by the Slovenian Electronic Communications Act (ZEKom-2). Where personal data are processed through cookies, such processing is additionally governed by the GDPR. Different legal bases apply depending on the category of cookie.

9.1 Strictly Necessary Cookies

Strictly necessary cookies are essential for the operation, integrity and security of the Website: they display Website content correctly, remember security settings, maintain session continuity, detect malicious traffic, protect against cyber attacks, and provide services explicitly requested by the user. Because these cookies are indispensable for providing the Website, they are installed without requiring prior consent. Where personal data are processed through strictly necessary cookies, the legal basis is Article 6(1)(f) GDPR (legitimate interests), together with the provisions of ZEKom-2 permitting the use of technically necessary cookies.

9.2 Analytics Cookies

Analytics cookies enable the Company to understand how visitors interact with the Website. This information is used exclusively to improve Website quality, performance and user experience, and

analytics cookies are installed only after the user has given valid consent. The legal basis for processing is Article 6(1)(a) GDPR.

9.3 Marketing Cookies

Marketing cookies are used to display advertisements that are more relevant to users and to measure the effectiveness of advertising campaigns; they may enable advertising partners to recognise users across multiple websites. They are installed only where valid consent has been obtained, on the legal basis of Article 6(1)(a) GDPR.

9.4 Social Media Cookies

Social media cookies support embedded content and interaction with third-party platforms and, depending on the service, may recognise users across different websites. They are used only after valid consent has been obtained, on the legal basis of Article 6(1)(a) GDPR.

10. Consent Requirements

The Company ensures that consent for optional cookies complies with the requirements of the GDPR, ZEKom-2 and the relevant case law of the Court of Justice of the European Union: consent must be freely given, specific, informed, unambiguous, and the result of a clear affirmative action. Silence, inactivity, pre-ticked boxes or continued browsing do not constitute valid consent.

Users can refuse optional cookies as easily as they can accept them. Refusing consent does not prevent access to the Website, except where a particular optional functionality inherently depends on the relevant technology. Consent records may be retained for compliance purposes in line with applicable legal obligations.

11. Cookie Preference Management Platform

The Website uses a Cookie Consent Management Platform ("**CMP**") that lets users accept all optional cookies, reject all optional cookies, select individual cookie categories, modify previously given consent, and withdraw consent at any time. The Company endeavours to ensure that the CMP complies with applicable legal requirements and reflects user choices immediately or as soon as reasonably practicable. Where legally required, no optional cookies are activated before the user's consent has been obtained.

12. Categories of Cookies Used on the Website

The Company classifies cookies according to their purpose and legal basis. Unless expressly stated otherwise, all optional cookies are activated only after obtaining your prior consent through the Website's Consent Management Platform.

The categories described below provide transparent information about the operation of the Website and the processing of information stored on, or accessed from, your terminal equipment. The list of individual cookies may change over time as the Website evolves or as third-party providers modify their services; where material changes occur, this Cookie Policy will be updated accordingly.

12.1 Strictly Necessary Cookies

Strictly necessary cookies are indispensable for the secure and proper operation of the Website; without them, the Website or individual services requested by users cannot function correctly. They are used exclusively for technical purposes, including authenticating requests, maintaining user sessions,

preventing fraudulent activity, protecting against automated attacks, balancing server load, storing security settings, storing cookie consent preferences, and maintaining essential Website functionality. These cookies do not require prior consent under ZEKom-2, because they are strictly necessary for providing the information society service explicitly requested by the user. Where personal data are processed through these cookies, the processing is based on Article 6(1)(f) GDPR (legitimate interests).

Examples:

Cookie	Provider	Purpose	Retention
Cookie consent	Company	Stores your consent choices	12 months
Session cookie	Company	Maintains browsing session	Session
Security cookie	Company	Prevents malicious requests	Session
Load balancing	Company	Ensures Website availability	Session

12.2 Analytics Cookies

Analytics cookies help us understand how visitors interact with the Website by collecting statistical information on pages viewed, navigation paths, duration of visits, click behaviour, traffic sources, device categories, browser characteristics, general geographical region, and Website performance. This information is aggregated wherever reasonably possible, and the Company does not use analytics cookies to directly identify individual visitors. Analytics cookies are installed only after valid consent has been obtained, on the legal basis of Article 6(1)(a) GDPR.

Typical analytics cookies:

Cookie	Provider	Purpose	Retention
ga	Google Analytics 4	Distinguishes visitors	Up to 13 months
ga*	Google Analytics 4	Maintains session state	Up to 13 months
Landing page cookie	Company	Analyses entry pages	7 days
Traffic source cookie	Company	Identifies referral source	7 days

12.3 Functional Cookies

Functional cookies improve user experience by remembering preferences selected during previous visits, such as preferred language, display preferences, accessibility settings, region, multimedia preferences and consent settings. Where such cookies are not strictly necessary for providing the Website, they are activated only after your consent has been obtained.

12.4 Marketing and Advertising Cookies

Marketing cookies are designed to improve the relevance of advertising shown to users. They may be used to measure advertising effectiveness, limit repeated advertisements, personalise advertising, create audience segments, analyse campaign performance, measure conversions and optimise marketing expenditure, and may recognise your browser across multiple websites operated by different organisations. The Company does not receive detailed information about your browsing activity on third-party websites, but generally receives aggregated campaign statistics. Marketing cookies are activated only after obtaining your consent, on the legal basis of Article 6(1)(a) GDPR.

Examples:

Cookie	Provider	Purpose	Retention
_fbp	Meta	Advertising and conversion measurement	3 months
IDE	Google	Advertising	Up to 13 months
NID	Google	Advertising preferences	Up to 6 months

12.5 Embedded Media Cookies

The Website may display multimedia content provided by third parties, such as videos, interactive maps, audio content and social media content. Where such content is loaded, the relevant provider may place cookies on your device. The Company endeavours to configure embedded services in privacy-enhanced mode wherever available. Where consent is legally required, embedded content relying on optional cookies is activated only after the user has granted the relevant consent.

13. Google Consent Mode v2

The Website may implement Google Consent Mode v2 to ensure that Google services respect users' consent choices, letting Google's services adapt their behaviour according to the permissions granted through the Consent Management Platform. Depending on your choices, Google services may receive consent signals indicating whether the categories of analytics_storage, ad_storage, ad_user_data and ad_personalization have been authorised.

Where consent is denied, Google services operate in a restricted mode intended to minimise the collection of personal data and prevent the deployment of optional cookies, subject to Google's technical implementation. The Company configures Google Consent Mode in accordance with applicable legal requirements and endeavours to ensure that optional processing does not occur before valid consent has been obtained.

14. Google Tag Manager

The Website may use Google Tag Manager ("GTM") to deploy and manage Website tags. GTM itself does not ordinarily collect personal data or place cookies for advertising or analytics purposes; instead, it acts as a container through which other scripts and technologies may be loaded. Whether personal data are processed depends on the individual services deployed through GTM. Where tags loaded through GTM require consent, they are activated only after the user has granted the relevant consent through the Consent Management Platform.

15. Server-Side Tagging

To improve Website performance, security and privacy, the Company may implement server-side tagging technologies, which - unlike traditional browser-based tracking - allow certain processing activities to be carried out through servers controlled by the Company or trusted service providers. Where implemented, server-side tagging is configured to reduce unnecessary disclosure of personal data to third parties wherever reasonably possible.

This does not alter the legal basis required for processing personal data: where consent is required for a particular processing activity, it will continue to be obtained before processing begins.

16. Google Analytics 4

Subject to your consent, the Website uses Google Analytics 4 ("**GA4**"), a web analytics service provided by Google Ireland Limited, to understand how visitors interact with the Website through statistical reports based on aggregated usage information. Depending on configuration, GA4 may collect information on pages viewed, session duration, approximate geographical location, browser type, operating system, device characteristics, interactions with Website content, traffic source and referral information.

The Company has configured GA4 to apply privacy-enhancing settings wherever reasonably available, including reduced data retention and IP processing measures provided by Google, and does not use GA4 to directly identify individual users. Google Analytics data are used solely to improve the quality, security and performance of the Website.

17. Google Advertising Services

Subject to your prior consent, the Website may use advertising services provided by Google Ireland Limited, Gordon House, Barrow Street, Dublin 4, Ireland, together with affiliated Google entities where applicable, including Google Ads, Google Ads Conversion Tracking, Google Remarketing, the Google Display Network, Google Enhanced Conversions (where implemented) and other advertising technologies made available through Google's advertising platform. These services are used to measure the effectiveness of advertising campaigns, understand how visitors reach the Website, display advertisements that may be relevant to users, limit repeated display of identical advertisements, optimise advertising expenditure and generate aggregated campaign reports.

Google advertising technologies may assign unique identifiers to your browser or device and may recognise interactions occurring across websites participating in Google's advertising network. The Company does not receive information that would let it directly identify individual visitors through Google's advertising services. Where Google acts as an independent controller for its own processing activities, that processing is governed by Google's own privacy documentation. Optional advertising cookies associated with Google services are activated only after valid consent has been obtained.

18. Meta Pixel

Subject to your consent, the Website may use Meta Pixel, a technology provided by Meta Platforms Ireland Limited, Merrion Road, Dublin 4, Ireland, to measure the effectiveness of advertisements displayed through Meta services, including Facebook and Instagram. Depending on configuration, Meta Pixel may record events such as page views, visits to specific content, navigation behaviour, interactions with Website features and completion of designated conversion events. This information lets the Company evaluate advertising performance, optimise marketing campaigns, create anonymous audience segments, measure conversion rates and better understand visitor interactions with the Website. The Company does not receive information allowing direct identification of individual users.

Certain processing carried out through Meta Pixel may involve Meta acting as an independent controller or, where applicable under relevant legislation and case law, as a joint controller for the initial collection and transmission of certain event data. The respective responsibilities of the Company and Meta are determined by applicable contractual arrangements and the requirements of the GDPR. Further processing carried out by Meta after receiving event data is governed exclusively by Meta's own privacy documentation.

19. Embedded YouTube Content

The Website may contain embedded videos provided through YouTube, a service operated by Google. Where technically feasible, embedded videos are configured to operate using YouTube's Enhanced Privacy Mode, which is intended to reduce the amount of information stored on users' devices before interaction with embedded content.

However, once a visitor actively plays a video or otherwise interacts with YouTube content, YouTube may process information relating to browser characteristics, device information, IP address, video playback, user preferences and interactions with embedded content. Such processing is governed by Google's own privacy documentation. Where required by law, embedded YouTube content relying on optional cookies is activated only after consent has been granted.

20. Third-Party Service Providers

The Company engages carefully selected third-party providers whose services contribute to the operation, security, analytics or marketing of the Website, including Google Ireland Limited, Meta Platforms Ireland Limited, YouTube, website hosting providers, content delivery network providers, security service providers, analytics providers and marketing technology providers. Each provider processes information only to the extent necessary for the services it provides.

Where third-party providers process personal data on behalf of the Company, appropriate contractual arrangements are in place in accordance with Article 28 GDPR. Where providers process personal data for their own independent purposes, that processing is governed by their own privacy documentation.

21. International Transfers of Personal Data

Certain service providers engaged by the Company operate internationally, so personal data collected through cookies or similar technologies may, in limited circumstances, be transferred to recipients located outside the European Economic Area ("EEA"). Whenever such transfers occur, the Company endeavours to ensure that an appropriate transfer mechanism recognised under Chapter V GDPR is in place - depending on the circumstances, an adequacy decision adopted by the European Commission, the EU-U.S. Data Privacy Framework where applicable, Standard Contractual Clauses adopted by the European Commission, supplementary contractual, technical or organisational safeguards, or another transfer mechanism expressly recognised under applicable law.

Before engaging service providers established outside the EEA, the Company assesses, where appropriate, whether the recipient can provide an adequate level of protection for personal data, and implements supplementary safeguards where necessary to reduce the risks associated with international data transfers.

22. Data Retention

Different cookies remain stored for different periods depending on their function. Session cookies are automatically deleted when the browser session ends. Persistent cookies remain stored until their predefined expiry date, until manually deleted by the user, or until automatically deleted by the browser.

The Company regularly reviews the retention periods applicable to cookies and seeks to ensure that information is not retained longer than reasonably necessary for the purposes for which it was collected. Where information collected through cookies is incorporated into other systems maintained by the

Company, it is retained only for as long as necessary to fulfil the relevant processing purpose or comply with applicable legal obligations.

23. Automated Decision-Making and Profiling

The Company does not use information collected through cookies to make decisions that produce legal effects concerning users, or that similarly significantly affect them, within the meaning of Article 22 GDPR. Where marketing cookies are enabled, certain third-party advertising providers may create audience segments or advertising profiles based on browsing behaviour; such profiling is carried out by the respective providers under their own privacy documentation, and only after the required consent has been obtained. The Company does not make decisions solely by automated means based on information collected through cookies.

24. Security of Information

The Company applies appropriate technical and organisational measures to protect information collected through cookies against accidental or unlawful destruction, loss, alteration, unauthorised disclosure or unauthorised access, including encrypted communications using TLS, access control mechanisms, role-based authorisation, logging and monitoring, vulnerability management, secure software development practices, and periodic review of third-party service providers.

Although the Company continuously seeks to maintain a high level of information security, no electronic communication or storage system can be guaranteed to be completely secure; the Company therefore cannot guarantee absolute security but undertakes to implement safeguards appropriate to the risks involved.

25. Your Rights Under the GDPR

Where the use of cookies involves the processing of personal data, you are entitled to exercise the rights granted under the GDPR, subject to the conditions and limitations laid down therein. Depending on the circumstances, you have the following rights.

25.1 Right of Access

You have the right to obtain confirmation as to whether we process your personal data and, where that is the case, to obtain access to such data together with information concerning the processing activities carried out by the Company.

25.2 Right to Rectification

You have the right to request that inaccurate or incomplete personal data concerning you be corrected without undue delay.

25.3 Right to Erasure

You may request the deletion of your personal data where one of the conditions laid down in Article 17 GDPR applies, including where the data are no longer necessary for the purposes for which they were collected or where consent has been withdrawn and no other legal basis exists. This right is not absolute and may be limited where continued processing is required by applicable law.

25.4 Right to Restriction of Processing

You may request that processing of your personal data be temporarily restricted in the circumstances specified in Article 18 GDPR.

25.5 Right to Data Portability

Where processing is based on consent or on a contract and is carried out by automated means, you may request that your personal data be provided in a structured, commonly used and machine-readable format or transmitted directly to another controller where technically feasible.

25.6 Right to Object

Where processing is based on the Company's legitimate interests, you have the right to object to such processing at any time on grounds relating to your particular situation. Where personal data are processed for direct marketing purposes, you have the right to object at any time without providing any justification.

25.7 Right to Withdraw Consent

Where processing is based on your consent, you may withdraw that consent at any time. Withdrawal of consent does not affect the lawfulness of processing carried out before the withdrawal became effective. Consent may be withdrawn through the Website's Cookie Settings or by other methods described in this Cookie Policy.

25.8 Right to Lodge a Complaint

If you believe that your personal data have been processed in violation of applicable data protection legislation, you have the right to lodge a complaint with the competent supervisory authority. For the Republic of Slovenia, the competent supervisory authority is:

Information Commissioner of the Republic of Slovenia (Informacijski pooblaščenec Republike Slovenije), Dunajska cesta 22, 1000 Ljubljana, Republic of Slovenia. Website: <https://www.ip-rs.si>.

The exercise of this right is without prejudice to any other administrative or judicial remedy available under applicable law.

26. Managing Cookie Preferences

You remain in full control of your cookie preferences throughout your use of the Website. You may accept all optional cookies, reject all optional cookies, enable only selected categories, withdraw previously granted consent, delete cookies already stored on your device, or configure your browser to block specific categories of cookies.

Most modern web browsers also let users review stored cookies, delete individual cookies, block third-party cookies, block all cookies, receive notifications before cookies are stored, and automatically delete cookies when the browser closes. Please note that disabling certain cookies may reduce the functionality, convenience or performance of the Website.

27. Children's Privacy

The Website is intended for a general audience and is not directed towards children. The Company does not knowingly use cookies to collect personal data from children or to profile children for advertising or marketing purposes.

Where the Company becomes aware that personal data relating to a child have been collected contrary to applicable law, appropriate steps will be taken to delete such information without undue delay. Parents or legal guardians who believe that a child has provided personal data through the Website are encouraged to contact the Company.

28. Review and Updates of this Cookie Policy

The Company regularly reviews this Cookie Policy to ensure it remains accurate, transparent and compliant with applicable legislation and technological developments. Updates may become necessary as a result of amendments to applicable legislation, guidance issued by supervisory authorities, decisions of the Court of Justice of the European Union, implementation of new Website functionality, the introduction of new service providers, changes to existing technologies, or improvements to the Company's internal compliance framework.

Where changes materially affect the use of optional cookies or the processing of personal data, users will be informed through appropriate means. Where required by law, new consent will be obtained before optional cookies are deployed.

29. Contact Details

If you have any questions regarding this Cookie Policy, cookies used on the Website or the processing of personal data, please contact us using the details below.

Controller

Armida, organizacija dogodkov, d.o.o.

Trnava 76, 3303 Gomilsko, Republic of Slovenia

Registry Nr.: 9947191000

VAT ID Nr.: SI 99575256

E-mail: info@guardiansfestival.com

Website: <https://guardiansfestival.com>

30. Governing Law

This Cookie Policy shall be governed by and interpreted in accordance with the laws of the Republic of Slovenia together with directly applicable legislation of the European Union.

Any dispute relating to this Cookie Policy shall be subject to the jurisdiction of the competent courts of the Republic of Slovenia, Ljubljana, unless mandatory provisions of applicable law provide otherwise.

31. Effective Date

Version: 2.0

Effective Date: 13 July 2026

Last Updated: 13 July 2026

The latest version of this Cookie Policy is always available on the Website.

Where applicable law requires renewed consent following amendments to this Cookie Policy or changes to the cookies used on the Website, such consent will be obtained through the Website's Consent Management Platform before optional cookies are activated.

APPENDIX A - COOKIE INVENTORY

The Company maintains an up-to-date inventory of all cookies and similar technologies deployed on the Website. Where applicable, the inventory records each cookie's name, provider, domain, purpose, category, type (first-party or third-party), retention period, legal basis, whether personal data are processed, and whether international transfers may occur.

The cookie inventory is reviewed periodically and updated whenever cookies are added, modified or removed.
